

Caution - How to Delete Saved Passwords

If you choose to delete your passwords please remember that all passwords stored by the internet browser will be lost. Please make sure you have those passwords before deleting. You can simply retype the password over the saved password prior to logging in if you don't want to delete your passwords.

Internet Explorer

1. Select "Internet Options" under the "Tools" menu
2. Under the "General Tab - Browsing History" click on the "Delete" Button (highlighted in Example A)
3. Click on the "Delete Passwords" button to remove saved passwords (Example B)

Example A

Example B

Firefox

1. Select "Clear Private Data" under the "Tools" menu
2. Check the "Saved Passwords" check box
3. Click on the "Clear Private Data Now" button
